### Warning!!

Based on the latest development and events in the Day Old Chicks (DOC) and Egg industry, Agrited honesty and loyalty to our distinguished customers has always been on the highest level. Agrited always had the highest level of monitoring and quality control by procedure, equipment, management and staff!!

Our moto is to have internal integrity and the highest level of final DOC product exists in world, Africa and specially in Nigeria.

Lately we have noticed growing cases of customers that are not getting Agrited original DOC but being **switched** with sick/mortality/low quality/cockerel.

### We recommend the following:

- Ask your driver to verify the quality of the DOC before collecting and ensure proper monitoring of your driver's movement and activity while on transit.
- Please send a farm representative to collect the DOC directly from our dispatch room.
- Don't mix several Doc companies in one transportation van.
- Use disinfectant (sterifume) to clean your farm.
- Implement high level of bio security procedures.
- Buy only from Agrited known distributor.
- Confirm the drivers doesn't replace any of our high level DOC with sick/mortality/low level/cockerel.

\*Please be informed that **Agrited** will not take any responsibility or insure any of our DOC after been collected from our dispatch room or distributors!!!
